Since 1977 hundreds of Grizzly knuckleboom cranes fitted with solid waste grapples have been shipped, pre-tested and fully assembled to sites all over the United States and Canada.

The Grizzly Solid Waste Grapple / Tamper is a combination tamper and bucket as shown below.

Our grapple design has been time-tested and can go on our stationary cranes or on most backhoes and excavators.

Grizzly Solid Waste Grapple / Tamper components are assembled to provide greater protection to cylinders, etc. They are crafted by hand, and with pride. You cannot buy a higher quality attachment.
